

VINAYAK SHINDE

MERN Stack Developer | Fresher Software Developer

Wakadai Nagar, Mangaon, Raigad, Maharashtra 402104 | 7058816692 | vinushinde2525@gmail.com | github.com/vinushinde2525-sys | linkedin.com/in/vinu-shinde-930507351

PROFESSIONAL SUMMARY

MERN Stack Developer fresher with hands-on experience building, testing, and deploying production-style full-stack JavaScript applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with practical experience implementing JWT authentication, role-based access control, real-time features (Socket.IO), and RESTful API design. Comfortable across the full delivery lifecycle — from React Three Fiber 3D interfaces to automated testing (Jest, React Testing Library, Supertest) and GitHub Actions CI/CD pipelines that verify every push. Has deployed full-stack applications to Vercel, Render, and Netlify, and uses AI-assisted tools (Claude AI, ChatGPT, Google Gemini) to accelerate prototyping and debugging. Seeking a MERN Stack Developer Internship or Junior Full-Stack Developer role to build and maintain scalable, production-grade web applications.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Query (TanStack Query), React Router, Framer Motion, Responsive UI Development

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Middleware, Role-Based Access Control (RBAC), Socket.IO

Database: MongoDB, MongoDB Atlas, Mongoose, PostgreSQL (currently learning)

Testing: Jest, Vitest, React Testing Library, Supertest, Unit & Component Testing, In-Memory MongoDB Testing

DevOps & Deployment: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker, Vercel, Netlify, Render, Railway

3D / Modern Web: Three.js, React Three Fiber (R3F), Interactive 3D Product Visualization

PROJECTS

3D Café — Full-Stack Food Ordering Platform with 3D Visualization | *React, TypeScript, Node.js, Express.js, MongoDB, Three.js / R3F, Socket.IO, Redux Toolkit* | *Live: threeed-cafe-fullstack-platform-1.onrender.com*

- Built a full-stack TypeScript MERN platform combining an interactive 3D product viewer (React Three Fiber) with an admin ERP system covering inventory, CRM, and staff HR & payroll.
- Implemented JWT access/refresh token rotation, Google OAuth, and Role-Based Access Control across customer, staff, and admin roles, with Socket.IO powering real-time order tracking and a live kitchen-queue dashboard.
- Wrote 66 automated tests (Vitest + React Testing Library on the frontend, Jest on the backend) covering Redux slices, middleware, and UI components, and built GitHub Actions CI/CD pipelines — with a MongoDB service container on backend CI — that run tests and verify the build on every push.
- Deployed the full-stack application to Render with Docker Compose for local multi-service development; maintained a clean, zero-error TypeScript and ESLint build.

Grilli — Full-Stack Food Ordering & Reservation Platform | *React, Redux Toolkit, React Query, Node.js, Express.js, MongoDB Atlas, Socket.IO, JWT* | *Live: grilli-fine-dining-fullstack-ic67m47po.vercel.app*

- Developed a full-stack restaurant platform with menu browsing, table reservations, persistent cart, auth-gated checkout, and order history, backed by a JWT-authenticated Express API and MongoDB Atlas.
- Built an admin panel and a singleton Socket.IO pattern for stable real-time order notifications; separated client state (Redux Toolkit) from server state (React Query) for predictable caching and loading behavior.
- Added an automated test suite — Jest + Supertest against the real Express app with an in-memory MongoDB on the backend, Jest + React Testing Library for cart logic and components on the frontend — and GitHub Actions CI pipelines that run tests and build on every push/PR.
- Deployed frontend to Vercel and backend to Render; identified and resolved real production bugs including a MongoDB index conflict, an authentication redirect failure, and a Socket.IO reconnect loop.

Additional Projects — Skills & Technologies Gained

- Tourly (React, Vite, Express.js REST API), Homeverse (React, TanStack Query, Zustand, React Hook Form), SecretCoder (React, Three.js/R3F, Framer Motion) — reusable component architecture, custom hooks, server-state management, form validation, and 3D/WebGL animation-driven UI.

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

D.G. Tatkar Mahavidyalay, affiliated to University of Mumbai — CGPI: 7.18 (6th Semester: 7.40)

Higher Secondary Certificate (HSC), Maharashtra Board — 2022 — 73.17%

Secondary School Certificate (SSC), Maharashtra Board — 2020 — 86.80%

DEPLOYMENT & TOOLS

Hands-on experience deploying full-stack MERN applications with separate frontend/backend hosting and environment-based configuration, using Vercel, Netlify, Render, and Railway. Set up GitHub Actions CI/CD pipelines that run automated tests and verify the build on every push, with Docker Compose for local multi-service environments.

AI & MODERN DEVELOPMENT SKILLS

- AI-assisted development workflow and prompt engineering using Claude AI, ChatGPT, and Google Gemini to speed up prototyping, debugging, and documentation.
- Designing application interfaces with Google Stitch AI as part of an AI-assisted, “vibe coding” workflow, while maintaining code quality and review discipline on real React/Node.js codebases.
